**I. ACCUSED INSTRUMENTALITY: DELL.COM**

Claim	Accused Instrumentality
Claim 1  1. A method for assisting a user in identifying a subfamily of items within a family of items said method performed with a server connected to a client computer through a computer network, comprising the steps of:	<p>Dell performs a method for assisting a user in identifying a subfamily of items within a family of items, the method performed with a server connected to a client computer through a computer network.</p> <p>In particular, for example, Dell servers that are connected to clients over the Internet at <a href="http://www.dell.com">www.dell.com</a> perform the method. In the example screenshots below, the method is used for assisting users in identifying subfamilies of items within families of items, including laptops and desktops, among others.</p>  <p>The screenshot shows the Dell homepage with a red banner for a '2 Day Sale' on select laptops &amp; desktops with 'Free shipping and savings up to 30%'. It features a red desktop tower, a monitor with a beach scene, and a silver laptop. Below the banner are three small boxes for 'Dell Services', 'Headlines', and 'Dell Deals'.</p>
(a) providing a computer readable data file of stored information representing at least one family of items, said data file identifying at least one alternative for each item,	<p>Dell provides via <a href="http://www.dell.com">www.dell.com</a> a computer readable data file of stored information representing at least one family of items, the data file identifying at least one alternative for each item.</p> <p>As can be seen in the illustrative screenshots, one of the many families of items is Laptops. See <a href="http://www.dell.com/us/business/p/laptops">http://www.dell.com/us/business/p/laptops</a>, reachable from <a href="http://www.dell.com">www.dell.com</a> by selecting "For Small and Medium Business" and then "Laptops &amp; Notebooks".</p>
(b) reading said data file,	<p>Dell reads the data file.</p> <p>For example, it does so in the process of serving the page listing Laptops at <a href="http://www.dell.com/us/business/p/laptops">http://www.dell.com/us/business/p/laptops</a>.</p>

Claim	Accused Instrumentality
(c) displaying a feature screen indicating said alternatives represented in the family,	<p>Dell displays a feature screen indicating the alternatives represented in the family.</p> <p>As reflected in the below screenshot, Dell displays a feature screen indicating alternatives represented in the family of Laptops at <a href="http://www.dell.com/us/business/p/laptops">http://www.dell.com/us/business/p/laptops</a>. Along the left side of the page is a column listing available alternatives, including 4 alternatives for Laptop Screen Size, 4 alternatives for Operating System, and 3 alternatives for Laptop Weight, among other alternatives.</p> 
(d) accepting a first selection criteria of at least one alternative,	<p>Dell accepts a first selection criteria of at least one alternative.</p> <p>For example, a selection criteria corresponding to the "17 inches &amp; up" alternative under the heading "Laptop Screen Size" is accepted by Dell at <a href="http://www.dell.com">www.dell.com</a>. The selection criteria is used in step (e), below.</p>
(e) determining a first subfamily of items wherein each said item in the first subfamily satisfies said first selection criteria,	<p>Dell determines a first subfamily of items wherein each item in the first subfamily satisfies the first selection criteria.</p> <p>For example, Dell determines a first subfamily of items wherein each item in the first subfamily satisfies the first selection criteria corresponding to the "17 inches &amp; up" alternative.</p>
(f) determining available alternatives represented in the first subfamily,	<p>Dell determines available alternatives represented in the first subfamily.</p> <p>For example, Dell determines available alternatives in the first subfamily of "Laptops" satisfying the first selection criteria corresponding to the "17 inches &amp; up" alternative. The results of the determination are used in step (g), below.</p>

Claim	Accused Instrumentality
<p>(g) revising said feature screen to indicate the available alternatives of the first subfamily,</p>	<p>Dell revises the feature screen to indicate the available alternatives of the first subfamily.</p> <p>For example, Dell revises the feature screen to indicate the available alternatives of the first subfamily of "Laptops", as reflected in the below screenshot of <a href="http://www.dell.com/us/business/p/laptops#facets=55846~0~5930681&amp;p=1">http://www.dell.com/us/business/p/laptops#facets=55846~0~5930681&amp;p=1</a>. The feature screen has been revised. For example, two alternatives under Operating System are greyed out.</p> 
<p>(h) accepting a second selection criteria from said client computer via said computer network at said server wherein the second selection criteria comprises a resubmission to the server of the alternative or alternatives of the first selection criteria plus at least one alternative selected from the revised feature screen,</p>	<p>Dell accepts a second selection criteria from the client computer via the computer network at the server wherein the second selection criteria comprises a resubmission to the server of the alternative or alternatives of the first selection criteria plus at least one alternative selected from the revised feature screen.</p> <p>For example, a second selection criteria corresponding to the "16 GB" alternative under the "Memory" heading and the "17 inches &amp; up" alternative of the first selection criteria is accepted by Dell at <a href="http://www.dell.com">www.dell.com</a>. This second selection criteria is used in step (i), below. This second selection criteria is reflected in the URL below, which includes a "17 inches &amp; up" segment (highlighted in yellow), plus a "16 GB" segment (highlighted in Green):</p> <p><a href="http://www.dell.com/us/business/p/laptops#facets=51795~0~11401828,55846~0~5930681&amp;p=1">http://www.dell.com/us/business/p/laptops#facets=51795~0~11401828,55846~0~5930681&amp;p=1</a>.</p>

Claim 9  9. A method for assisting a user in identifying a subfamily of items within a family of items, the method comprising the following steps which are performed with a server connected to a computer network:	<p>Dell performs a method for assisting a user in identifying a subfamily of items within a family of items, the method comprising the following steps which are performed with a server connected to a computer network.</p> <p>In particular, for example, Dell servers that are accessible over the Internet at <a href="http://www.dell.com">www.dell.com</a> perform this method. In the example screenshots below, the method is used for assisting users in identifying subfamilies of items within families of items, including laptops and desktops, among others.</p> 
(a) providing a computer readable data file of stored information representing at least one family of items, said data file identifying at least one alternative for each item,	<p>Dell provides via <a href="http://www.dell.com">www.dell.com</a> a computer readable data file of stored information representing at least one family of items, the data file identifying at least one alternative for each item.</p> <p>As can be seen in the illustrative screenshots, one of the many families is Laptops. (c) displaying a feature screen indicating said alternatives represented in the family wherein data is output to a client computer via said computer network,	<p>Dell displays a feature screen indicating the alternatives represented in the family wherein data is output to a client computer via the computer network.</p> <p>As reflected in the below screenshot, Dell displays a feature screen indicating alternatives represented in the family of Laptops at <a href="http://www.dell.com/us/business/p/laptops">http://www.dell.com/us/business/p/laptops</a>. In so doing, it outputs, via the internet, to a client computer, data. Along the left side of the page is a column listing available alternatives, including 4 alternatives for Laptop Screen Size, 4 alternatives for Operating System, and 3 alternatives for Laptop Weight, among other alternatives.</p> 
(d) receiving and accepting a first selection criteria of at least one alternative from said client computer, said first selection criteria being received by said server from said client computer via said computer network,	<p>Dell receives and accepts a first selection criteria of at least one alternative from the client computer, the first selection criteria being received by the server from the client computer via the computer network.</p> <p>For example, a first selection criteria corresponding to the "17 inches &amp; up" alternative under the heading "Laptop Screen Size" is received and accepted by Dell at <a href="http://www.dell.com">www.dell.com</a>. The selection criteria is used in step (e), below.</p>
(e) determining a first subfamily of items wherein each said item in the first subfamily satisfies said first selection criteria,	<p>Dell determines a first subfamily of items wherein each item in the first subfamily satisfies the first selection criteria.</p> <p>For example, Dell determines a first subfamily of items wherein each item in the first subfamily satisfies the first selection criteria corresponding to the "17 inches &amp; up" alternative.</p>
